

Como funcionam os testes de integração?

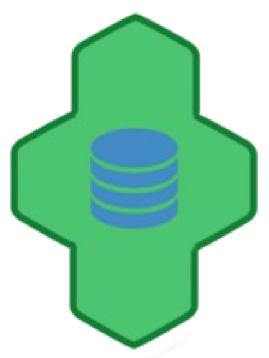

Tem que criar um banco só de testes pra toda vez que for testar?

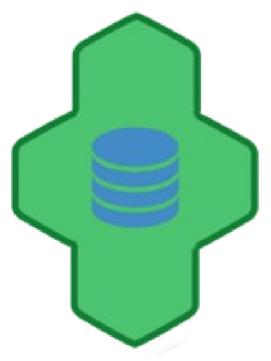

- Sequelize Mock
- Mongo Mem
- SQLite Mem
- Sinon Mock

```
{
  'novoLembrete': 'INSERT INTO devmt.todo',
  'faltaFazer': 'SELECT * FROM devmt.todo',
  'concluir': 'UPDATE devmt.todo',
  'esquecer': 'DELETE FROM devmt.todo'
}
```
